

KANBAN TOOL

The best way to organize work, now on your own servers.

Kanban Tool On-Site is the on-premise version of kanbantool.com service, which powers over 25,000 businesses and helps them achieve exceptional results by enabling better process visibility and team collaboration. Kanban Tool On-site gives you the same great experience and possibilities, while remaining fully under your control.

Kanban Tool On-Site is distributed as a Virtual Machine which can run on all popular operating systems, and supports variety of virtualization environments. Installation is simple and it will take just a few minutes to configure everything. The appliance is in OVF format, which is an open, secure and portable format for the packaging and distribution of software to be run in virtual machines. Any modern computer with at least 2 GB of RAM and supported virtualization environment (VMware or VirtualBox) should be able to handle typical load.

Customizable boards – Real Time Collaboration – Insightful Analytics

With Kanban Tool On-Site you get all perks of the online version plus:

Firewall protection

Don't be concerned about cloud security. On-site version runs behind your internal firewalls. It's stored on the machines you manage and trust.

Full independence

No Internet connection is required. On-site version is fully self-contained, does not need to connect to any external services, and users do not need to have Internet access either.

Improved data security

Gain full control and privacy over your data. Perform backups according to your own policies to meet strict corporate and regulatory requirements.

High reliability

You do not need to worry about the downtime or stable Internet connection. Your On-site version is always accessible and reliable.

Enterprise scaling

Whether you are a startup or a global enterprise, Kanban Tool On-Site is designed to meet your needs and grow along with you. You can easily scale by assigning more resources to virtual machine or by buying additional user licenses anytime, on a pro-rata basis.

Extreme customizability

Make every aspect of your new software exactly as you need it. With Developer Tools Power-up you can easily change the look and feel of your projects. You can even add more power by adding your own Javascript code.

Passionate support

Ever felt abandoned by a software vendor? That doesn't sound like us. We will help you get started and actively give support during your license period.

Easy integrations with existing software

With powerful API, scripting support and power-ups you can integrate Kanban Tool seamlessly with any applications and software you use.

Access from anywhere and anytime

Just like online version, Kanban Tool On-Site installation can be accessed and managed through any modern web browser. No user side installation and configuration is needed.

Easy start

Nothing is worse than overly complicated software that give you headache and difficult time starting. Kanban Tool is designed to let you start right away without any need for extra coaching.

From startups up to large corporations, Kanban Tool helps teams achieve better results. Don't be left out and experience the difference it makes.
