

Kanban Tool On-Site is the on-premise version of the Kanban Tool service, which you can run and manage in your own, secure environment.

It provides the same unprecedented promise and experience as the online [kanbantool.com](https://kanbantool.com) service, while remaining fully under your control.

## Key Benefits of Kanban Tool On-Site

### Uncompromised Security

The on-premise solution is ideal for keeping your sensitive data secure. No internet connectivity is needed and sensitive data is stored locally on a machine that you own and manage.

### System Control & Reliability

Gain complete control over the system and full visibility into the activity logs. Safely isolate your Kanban Tool instance from the outside world behind your own firewall, and don't rely on any third-party providers.

### Security-Driven Compliance

Now, your company can easily meet even the most demanding data security laws and compliance requirements as well as manage data backups according to own internal policies.

### No.1 On-Premise Kanban Solution

Kanban Tool is trusted by some of the top Fortune 500 companies from around the world. With Kanban Tool On-Site, you get the same experience, hosted on your own computer.

### Low Requirements

No special hardware or software is needed. Kanban Tool On-Site is provided as a Virtual Machine in Open Virtualization Format, and you can install it even on your own laptop.

### Quick & Easy Installation

We believe that software installation doesn't have to be complicated. The installation is a simple few-step process that usually takes around 15 minutes and doesn't require any special IT skills.

## The Trusted Solution

From startups to top Fortune 500 companies, Kanban Tool helps teams achieve better results.
