# 1. Introduction

Kanban Tool On-Site is the on-premise version of kanbantool.com service, which powers over 25,000 businesses and helps them achieve exceptional results by enabling better process visibility and team collaboration.

Kanban Tool On-Site gives you the same great experience and possibilities, while remaining fully under your control.

The on-premise version of Kanban Tool is really great if you are concerned about data security as it is fully autonomous, does not require internet connection, and allows to manage data backups according to any internal policies you may have.

This is a perfect solution for any organization seeking the safest way to use digital Kanban.

## 2. Technical requirements

Kanban Tool On-Site is distributed as a complete virtual machine image in OVA format and as a stand-alone .deb package for 64-bit Ubuntu 16.04 LTS.

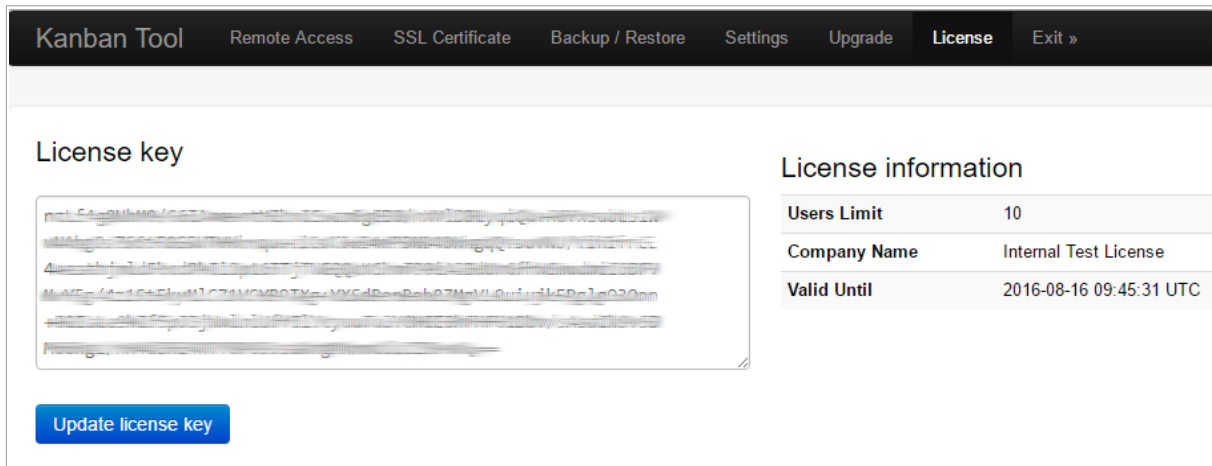

The only technical requirement is a modern computer with at least 4 GB of RAM and about 10 GB free disk space, which can run Virtual Box (<https://www.virtualbox.org>) or any other virtualization solution (like VMWare ESXi or Parallels).

We also provide **Kanban Tool On-Site Installation Guide** on request.

### 3. Free trial

Kanban Tool On-Site also comes with a 14-day free trial for 10 users, which gives an opportunity to test it and see if it matches your requirements. The evaluation license may be upgraded to full license at any time during the trial period.

To download Kanban Tool On-Site, please contact our Sales Team to get a custom link to register in our on-premise customer portal, through which an application download is possible.

The screenshot shows the 'License' page of the Kanban Tool interface. The navigation bar at the top includes 'Kanban Tool', 'Remote Access', 'SSL Certificate', 'Backup / Restore', 'Settings', 'Upgrade', 'License', and 'Exit »'. The main content area is divided into two sections: 'License key' and 'License information'. The 'License key' section contains a text area with a blurred license key and an 'Update license key' button. The 'License information' section contains a table with the following data:

License information	
Users Limit	10
Company Name	Internal Test License
Valid Until	2016-08-16 09:45:31 UTC

## 4. Payment options

Kanban Tool On-Site licenses are sold in packs of 10 users and billed annually. You can buy additional 10-user pack licenses at any time. The cost of your new licenses will be prorated for the time remaining in your current license period, so that the renewal date for new licenses always coincide with your existing license.

Licenses must always be purchased in 10-user packs. For teams smaller than 10 people, we recommend using our online [kanbatool.com](https://kanbatool.com) service.

**Price Validity:** 30 days

**Payment Terms:** 21 days

**Type of payment:** Credit card, debit card or wire transfer

**Delivery Time:** Usually within 24h

**Additional Charges:** No charges or hidden costs

**Minimal order:** 1 license pack of 10 users

**Discounts:** We offer volume discounts. Please [Contact Sales](#) for more information.

## 5. How to place an order?

The purchase process starts with a 14-day free trial. As soon as you provide us with your company email address, we will generate a custom link to register in our on-premise customer portal and to download the trial version of Kanban Tool On-Site.

To place an order and to start a 14-day free trial please contact us on: [sales@kanbantool.com](mailto:sales@kanbantool.com).

Please let us know the number of licenses you wish to purchase, and advise of the full name and an email address of the person who will be responsible for the Kanban Tool On-Site License and installation in your company.

In case of any questions, please contact us on:  
[sales@kanbantool.com](mailto:sales@kanbantool.com).
