Kanban Tool On-Site

Datasheet

kanban tool

1.Introduction

Kanban Tool On-Site is the on-premise version of kanbantool.com *service*, which powers over 25,000 businesses and helps them achieve exceptional results by enabling better process visibility and team collaboration. Kanban Tool On-Site gives you the same great experience and possibilities, while remaining fully under your control.

The on-premise version of Kanban Tool is great if you are concerned about data security as it is fully autonomous, does not require internet connection, and allows you to manage data backups according to any internal policies you may have. This is a perfect solution for any organization seeking the safest way to use digital Kanban.

2. Technical requirements

Kanban Tool On-Site is distributed as a complete virtual machine image in OVA format and as a stand-alone .deb package for 64-bit Ubuntu 20.04 LTS.

The only technical requirement is a modern computer with at least 4 GB of RAM and about 10 GB free disk space, which can run Virtual Box (free for commercial and personal use, download *here*), or VMware environments (download here).

We also provide a **Kanban Tool On-Site** Installation Guide.

3. 14-day free trial

Kanban Tool On-Site also comes with a 14-day free trial for 10 users, which testing it and seeing if it matches your requirements. The evaluation license may be upgraded to a full license at any time during the trial period.

To download Kanban Tool On-Site, please contact our Sales Team to get a custom link to register in our on-premise customer portal, through which an application download is possible.

4. Payment options

Kanban Tool On-Site licenses are sold in packs of 10 users and billed annually. You can buy additional 10-user pack licenses at any time. The cost of your new licenses will be prorated for the time remaining in your current license period so that the renewal date for new licenses always coincides with your existing license.

Licenses must always be purchased in 10-user packs. For teams smaller than 10 people, we recommend using our online kanbatool.com service.
